Dear Mr. Gabryel:

NUS Corporation is under contract to the U.S. Environmental Protection Agency (EPA) as a technical and management services contractor in support of the EPA's hazardous waste site assessment activities.

Per our telephone conversation of June 28, 1990, and my subsequent conversation with Ken Jackson on July 2, 1990, NUS/FIT has rescheduled onsite reconnaissance and environmental sampling activities at James River Inc. Mill No. 8 for the morning of Wednesday, July 11, 1990, weather permitting, rather than Tuesday, July 17, 1990, as was originally planned. A representative from the Massachusetts Department of Environmental Protection (MA DEP) may accompany us for the sampling effort.

During sampling activities, the field team will be dressed in white Saranex tyveks, slushboots, gloves, and full-face respirators, per the NUS/FIT Site Safety Plan, which must be followed.

Should you not be available to meet us on July 11, I would request that either Mr. Ken Jackson or Mr. Leo Collette be there to receive your replicate set of samples, and related chain-of-custody form at the conclusion of sampling activities. Since the samples must be kept cool, I would also suggest that you have a cooler with a supply of ice ready to receive the samples.

If you have any additional questions, please contact me at (617) 275-2970, extension 235.

Thank you very much for your continued cooperation.

Very truly yours,

Susan M. Koszalka
